## 2022 SELECTED REPORTABLE COMMUNICABLE DISEASES DATA BRIEF

According to the NC Administrative Code (rule 10A NCAC 41A.0101), select communicable disease and conditions are to be reported to the Division of Public Health (DPH) within specified timeframes, depending on the disease. Some of these conditions are rarely if ever reported to occur in Guilford County.

| Reportable Disease                                   | 2018   |       | 2019           |        | 2020           |                  | 2021   |       |
|--|--------|-------|----------------|--------|----------------|------------------|--------|-------|

## **Technical Notes:**

\*Rates are expressed per 100,000 population. Please note that rates based on small numbers (fewer than 20 cases) are unstable and should be interpreted with caution. 2019 thru 2021 counts and rates include "confirmed" and "probable" case definitions.

<sup>1</sup>Lymphogranuloma venereum cases included in number count with Chlamydia starting in 2021.

<sup>2</sup> 2019 thru 2021 Hepatitis B (perinatally acquired) cases were investigated by LHD but not yet reported to CDC. Data source for risk denominator was Resident Live Births.

- <sup>3</sup> Zoonotic: Animal to human transmission.
- <sup>4</sup> Prion: Human prion protein specific diseases impacting the brain.

<sup>5</sup> Bacterial /Antibiotic Resistant: Antimicrobial-resistant or susceptible bacterial infections.

<sup>6</sup> Healthcare-Associated: Infections associated with transmission in a healthcare setting.
