Reduce the Number of Deaths from Heatstroke by Remembering to ACT

- **A**: Avoid heatstroke-related injury and death by never leaving your child alone in a car, not even for a minute. And make sure to keep your car locked when you’re not in it so kids don’t get in on their own.

- **C**: Create reminders by putting something in the back of your car next to your child such as a briefcase, a purse or a cell phone that is needed at your final destination. This is especially important if you’re not following your normal routine.

- **T**: Take action. If you see a child alone in a car, call 911. Emergency personnel want you to call. They are trained to respond to these situations. One call could save a life.

Teach Kids Not to Play in Cars

- Make sure to lock your vehicle, including doors and trunk, when you’re not using it. Keep keys and remote entry fobs out of children’s sight and reach.

- Teach kids that trunks are for transporting cargo and are not safe places to play.

- If your child is missing, get help and check swimming pools, vehicles and trunks. If your children are locked in a car, get them out as quickly as possible and dial 911 immediately. Emergency personnel are trained to evaluate and check for signs of heatstroke.

Go a Step Further: Create Extra Reminders and Communicate with Daycare

- Create a calendar reminder for your electronic devices to make sure you dropped your child off at daycare.

- Develop a plan with your daycare so that if your child is late, you’ll be called within a few minutes. Be especially careful if you change your routine for dropping off children at daycare.

Heatstroke is the leading cause of non-crash, vehicle-related deaths for children. On average, every 10 days a child dies from heatstroke in a vehicle.
