

Smiles in the Classroom

Our dental health hygienists are licensed and registered with additional training and certification in Dental Public Health.

Dental Screenings in selected elementary schools in public Guilford County schools.

Specially trained Public Health Dental Hygienists perform dental screenings in selected grade levels in public Guilford County schools. These screenings are not a substitute for regular dental exams from your dentist. They are a quick assessment of overall oral health using a flashlight and a tongue depressor. While screening, Public Health Dental Hygienists wear a mask and gloves to prevent the spread of germs.
